EDUCATION

HARVARD UNIVERSITY <i>M.S. in Data Science, Harvard Griffin GSAS (Harvard SEAS)</i>	Cambridge, Massachusetts Aug 2026 - Feb 2028
AALTO UNIVERSITY <i>B.Sc. in Industrial Engineering and Management; Minor in Computer Science</i>	Espoo, Finland Aug 2023 - Feb 2026
• GPA 4.9/5.0 (Honors); completed in 2.5 years. Thesis on the productivity impact of LLMs in enterprises and startups, graded 5/5; exchange at National University of Singapore. • Coursework: Data Structures and Algorithms, Software Engineering, Databases, Web Software Development, Information Security, and Machine Learning.	

EXPERIENCE

MIRACLE CONSULTING GROUP <i>Software Engineer Intern</i>	Helsinki, Finland May 2026 - Present
• Improved a Fortune 500 client's Graph-RAG solution running within its Oracle database and drove the project through client acceptance. • Develop end-user AI and analytics applications and a unified design system across the client's data products. • Build an internal agent harness that automates workflows across ERP, CRM, HR, and finance systems.	
CADENTIA TECHNOLOGIES <i>Founder's Associate</i> <i>Business Development Intern</i>	Helsinki, Finland Aug 2025 - May 2026 Feb 2025 - Aug 2025
• Worked directly with the CEO to research AI knowledge factories, build customer demos, and iterate the product for sales meetings; the demos helped secure the company's first Fortune 500 customer. • Automated market and competitive research and developed an internal AI video-production pipeline.	
AALTO UNIVERSITY DEPARTMENT OF COMPUTER SCIENCE <i>Teaching Assistant</i>	Espoo, Finland Sep 2024 - Jan 2025
• Taught and helped develop an introductory programming course; mentored first-year students in debugging and problem-solving.	

SELECTED SOFTWARE PROJECTS

CHAIN-OF-THOUGHT WORKSPACE ABLATION	Aug 2026
• Replicated Anthropic's J-space ablation on Qwen3-4B across GSM8K, MATH-500, and AIME; wrote the ablation, two-stream decoding loop, grading harness, and analysis (PyTorch, Transformers, RunPod A100). • Pre-registered the experiment and ran about 26 A100-hours; J-space ablation increased MATH-500 error by 8.0 points (95% CI 2.7-13.3), while norm-matched random ablation had no effect.	
KIN - iOS FAMILY PLANNER (APP STORE)	2026
• Designed and shipped a native SwiftUI family planner: shared calendar with natural-language event entry, AI weekly planning, chores and meals, Sign in with Apple accounts, and StoreKit 2 subscriptions (Swift, SwiftUI). • Built the backend as a Cloudflare Worker on D1: account-backed multi-device household sync with optimistic concurrency, Apple identity-token verification, and a rate-limited AI proxy (JavaScript, Cloudflare Workers, SQL).	
PERSONAL BRAIN	2026
• Built a local-first knowledge graph and MCP memory server with LLM-powered ingestion, semantic search, graph traversal, Ebbinghaus-style decay, and interactive visualization (Python, SQLite, embeddings).	
P-PASCAL - NUS HACK & ROLL	Jan 2026
• Built and shipped a full-stack social prediction-market app for friend groups, combining LLM-derived empirical priors with a logarithmic market scoring rule; won the main prize among nearly 1,000 participants (Python).	

SKILLS AND LEADERSHIP

Programming: Python, TypeScript, JavaScript, Swift, Scala, SQL, R
Technologies: PyTorch, React, SwiftUI, Cloudflare Workers, Oracle APEX, Neo4j, SQLite, Git, GitHub Actions, MCP
Languages: English (native), Swedish (native), Finnish (full working proficiency)
Awards: Hack & Roll Singapore main prize; Junction Top 5 and Snap AR 2nd place; Dean's Scholarship (2024, 2025)
Leadership: Aalto Triathlon Club CFO; Slush Team Lead; Finnish Marines NCO course valedictorian (#1/200)
